

# PRESS RELEASE

## PVC Suction Hose

**FOR IMMEDIATE RELEASE: 4/9/07**

### **Kochek Introduces PVC suction hose**

Kochek Company's PVC suction hose is specifically designed for the fire fighting market. Designed to Kochek's proprietary specifications the clear webbing allows for visual monitoring while the specially enhanced ribbing eliminates any collapsing.

The low profile, high strength, flexible polymer collars; simple and efficient two bolt connections; and new exclusive interlock provide superior strength and durability. The proven redundant sealing system insures a dependable no leak seal. Hose is available with long handle, rocker lug, Storz, or Cam lock connections. Hoses are available in standard 10 foot lengths, or odd lengths on request. These made in USA hoses are field repairable, using off the shelf replacement parts. A 5 inch Storz ridged long handle version is available – no wrenches needed.

For more than 20 years Kochek Company has manufactured the highest quality American-made specialty fire equipment for today's fire industry. Base in Putnam, Connecticut, Kochek is the nation's largest manufacturer of PVC light-weight suction hose and a wide variety of strainers, dry hydrants, elbows, adapters, caps, plugs, and valves.
