PVC SUCTION HOSE

Your Single Source of Water Supply

Our PVC suction hose is specifically designed for the firefighting market and to Kochek’s proprietary specifications.

KEY FEATURES:
- Meets all requirements of NFPA 1961
- Retains a quality wall thickness from 3” to 6” ID
- Flexibility from 150 F° to -40 F°
- UV protection designed into the hose
- 2 1/2” and 3” use bowl couplings

How Does Yours Measure Up?

<table>
<thead>

<td>1/4 (0.421)</td>
<td>1/4 (0.3125)</td>
</tr>
</tbody>
</table>

Kochek's specialty enhanced ribbing eliminates collapsing.

PVC suction options & finishes:
- NH R L F x NH RL Male Hardcoat
- Storz Rigid Long Handle Hard Coat
- Storz without Handle
- Aluminum Cam-Lock Couplings
- NH Folding Long Handle F x R L Male
- Storz Folding Long Handle

24K - 6” SUCTION SIAMESE:
- Easy and fast setup
- Eliminates the need to draft from both sides of the truck
- Able to maximize flow to truck and pump design as much as 2000 GPM with 24K
- Must have 2,000 GPM pump
ELITE PRO SERIES

DJ EPDM RUBBER LINED DOUBLE JACKET

This heavy duty double jacket rubber lined attack hose is NFPA compliant. Made in the U.S.A.

KEY FEATURES:

- 100% synthetic all polyester double jacket
- 100% mildew resistant
- Heavy wall EPDM rubber liner
- 10 year warranty
- 25% lighter

4 SIZES AVAILABLE:

DJP THERMOPLASTIC LINED DOUBLE JACKET SYNTHETIC

This lightweight compact all poly double jacket hose with TPU liner is ideal for high rise packs. It packs tighter allowing for reduced hose bed space. The smooth waterway reduces friction loss and improves flexibility. Made in USA.

KEY FEATURES:

- 100% synthetic all polyester double jacket
- 100% mildew resistant
- Polyurethane liner
- NFPA compliant
- 10 year warranty against manufacturing defects

</tr>
</tbody>
</table>

**Color Options:** Green or Red

Above shown with expansion couplings

**RTC COUPLINGS:**

- A reusable 1” Reverse Pin Lug, Lightweight Aluminum Coupling.
- Powder Coated for durability.
- Designed to be used with Kochek’s Booster hose.
- Storz reattachable couplings.

**APPLICATIONS:**

- Booster Reel Hose
- Industrial Hose
- Wildland/Forestry Fires
- Grass and Brush Fires

**KEY FEATURES:**

- Lightweight, kink resistant and non-collapsible.
- Equipped with Full Flow expansion ring and 1” Lightweight Aluminum Rocker Lug coupling.
- Single jacket, 100% high tensile strength virgin polyester yarns; smooth TPU lining ensures the minimum friction for maximum flow.
HOSE WASHERS

The hose washer permits washing of the fire hose without brushing the hose. Two cone shaped pressure jets wash the hose twice during each application. The impact of the pressure jets from two annular gaps pulls the hose through the washer (some hand guidance may be needed).

The water flow gaps come with default factory settings. If more or less, is needed, use provided allen wrenches to adjust. The small allen screw increases/decreases water flow while the larger allen screws lock the position.

OPERATION INSTRUCTIONS:

- Use on a flat, clean surface only.
- Connect a 2 1/2” hose the inlet of the hose washer. Slowly open the water supply to the connected hose line and begin flowing water to the appliance increase pressure slowly.
- Pass the hose through the washer orifice into the washer, the pressure of the water jets will aid in pulling the hose line through the washer.
- Slowly guide the hose through the washer to fully rinse dirt and debris from the hose, then repeat process if necessary.

KEY FEATURES:

- Comes with a water inlet screen to prevent impurities from entering the washer.
- Can be used up to 3” diameter hose.
- Weight: 17 lbs.
- Washer operates best at 100 PSI
- Warranty: 5 years

HOSE ROLLERS

We also carry two styles of Hose Rollers

KHW3
Up to 3” diameter hose
Washer comes standard with 2 ½” NH swivel (not shown in picture)

KHR-1
KHR Hose Drainer One Man

KHR-2
KHR Hose Drainer Two Man
KEY FEATURES:

- Constructed of light weight aluminum and stainless steel.
- Optional heavy duty bumper for added protection.
- Ideal for firefighting and industrial applications.
- Adjustable from FOG to straight stream
- Forestry Nozzles meets or exceed USDA FS 5100 Series Specifications.
- Red Anodizing is the standard color and finish.

BREAK-A-WAY NOZZLES

Combine our Shutoffs with our nozzles to build your own custom Kochek system for any application or need! Available with our ergonomic Pistol Grip or Bail style.

Order individually or with the pistol grip or bail.

DEFENDER SELECT

The high performance Defender Select Nozzles come with multiple constant gallonage flows in all positions. Made from lightweight, hard-coated and durable extruded aluminum.

KEY FEATURES:

- 4 Gallonage selection ring without pattern changes.
- Capable of flushing without shutting down.
- Durable polymer shut-off handles.
- Designed for use with foam eductors and foam tubes.

Spinning Teeth in polyethylene also in Stainless Steel (under request).

DEFENDER CONSTANT

The Defender Constant Nozzle is a heavy-duty, professional constant gallonage nozzle in all positions. They are made from lightweight, hard-coated extruded aluminum. This model features a two-part rubber bumpers for maximum protection and easier gripping.

3 SIZES AVAILABLE:

- 1"
- 1 1/2"
- 2 1/2"

KEY FEATURES:

- Ideal for use with foam eductors and foam tubes.
- Flush position capable of flushing without shutting down.
- Durable polymer shut-off handles.

Patriot Series
See page 18
Patriot Series

The Patriot series nozzle is the ultimate concept in firefighting nozzles. It features constant gallonage in all positions and flows and an improved FOG, and is more uniform with smaller water drops.

Key Features:

- No spinning teeth to break.
- Less friction loss through the nozzle.
- FLUSH position capable of flushing without shutting down.
- Better stream conversion.
- Ease of maintenance.

Designed to accomplish with the requirements of NFPA 1964 and EN15182-1, EN15182-2 Type 3.

# Self Leveling Floating Strainer

Most efficient strainer in today’s market!

## Key Features:
- Handle for ease of carrying
- Vortex Shield protects against whirlpooling
- Full time swiveling strainer
- Made with 8” tubing
- Increased flow rates due to high intake ratio
- Maximum pump flows
- Lightweight design
- NEW compact design for easy storage
- Also available with storz and camlock connections

BOTTOM GUARD BARREL STRAINER

An innovative design incorporating a unique guard that makes drafting possible in many conditions. Our rugged, lightweight, compact strainer allows for protected maximum flow.

KEY FEATURES:

- The “Bottom Guard Strainer” was designed to work with gravity. As the strainer moves toward the water’s bottom, the guard swivels to the underside of the barrel strainer, providing a clean, stable platform from which to draft.
- The high intake ratio allows for pump capacity flow rates while the bottom guard protects against debris from being drawn to the bottom, so silt, rocky and weeded conditions are not an issue.
- The balanced handle along with being light-weight makes it easy to carry and quickly deploy.
- Compact in design, the “Bottom Guard Strainer” makes for easy convenient storage.
- Available with Threaded, Storz, or Camlock connections in a range of sizes.
- Aluminum construction with a wrinkle black powder coated finish on the guard.
LOW LEVEL STRAINER

The low level strainer features full flow capacity with 8” tubing. Comes equipped with a standard external screen and a base pan designed with side walls to protect the tank.

KEY FEATURES:
- Made with 8” tubing
- Lightweight aluminum alloy
- Water Transfer Device
- Drafts down to 2” from bottom
- Pivoting, adjustable elbow
- Base pan design has additional side walls eliminating tank damage
- 2 1/2” to 6”, internal screen is standard
- 6” Big Water; external screen is standard
- Meets NFPA Standard

BASEMENT STRAINER

We carry three styles of Basement Strainers, Storz, NH & Camlock

OPTIONAL EXPANSION

Optional expansion includes:
- Made with 8” tubing
- Lightweight aluminum alloy
- Water Transfer Device
- Drafts down to 2” from bottom
- Pivoting, adjustable elbow
- Base pan design has additional side walls eliminating tank damage
- 2 1/2” to 6”, internal screen is standard
- 6” Big Water; external screen is standard
- Meets NFPA Standard

Barrels change according to the size/flow. Also available with Foot Valve.

BOX STRAINER

An innovative design incorporating a unique guard that makes drafting possible in many conditions. Our rugged, lightweight, compact strainer allows for protected maximum flow.

KEY FEATURES:

- High Performance Design
- Pump Capacity
- Lightweight
- Available in NH, Camlock and Storz connections (Storz: 2 1/2", 3", 4", 5", 6")
- Standard finish is Silvadillo Powder Coat with Black Powder Coated Grill
- Other Finishes offered: K-Coat Color (Colored Powder Coat)

Lays flat to prevent silt and debris from entering the strainer’s flow
ICE STRAINER

Long-handed attachment that simplifies water drafting from frozen ponds.

Our ice strainers are essential for firefighters who depend upon rural water in colder climates. Kochek’s Ice Strainer meets the industry’s need for a compact, efficient straining device that stays level while producing maximum water flow. Saves time by requiring a smaller hole in the ice, unlike traditional size strainers. Effectively blocks debris from entering the hose or pump, and the product’s design also ensures that the strainer remains below ice level. Kochek’s strainers are constructed of lightweight aluminum yet are durable to withstand harsh winter conditions while delivering maximum water flow capacity.

KEY FEATURES:
- Available in sizes from four to six inches.
- NH, Storz, and Camlock styles.
- Features a variable depth gauge.
- Attaches easily to the end of a suction hose then turns 90 degrees to allow the strainer to drop through a hole in the ice.

2 SIZES AVAILABLE:
- 4”
- 5”
- 6”

HOLLEY TRANSFER PIPE

Saving lives by moving water fast!

The Holley Transfer Pipe moves water more efficiently from a dump tank to a drafting tank when fighting fires. This process, commonly utilized in rural firefighting, is vital for saving firefighters time. The transfer pipe is an “all-in-one” unit that requires no assembly. The Holley Transfer Pipe replaces existing lower volume methods of transferring water.

DRY HYDRANTS

Dry Hydrant in use next to reflective sign

MATERIALS:
- Light-weight 6061-T6 Aluminum Alloy on connectors.
- Schedule 40 Standard PVC piping

CONFIGURATION:
- 90 and 45 Degree PVC elbows
- Threaded, Storz and Camlock
- Complete Line of PVC Strainers
- Full-Time Swivel available on the riser
- All Dry Hydrants include screen
HZDRANT CONVERTERS | SZMC LOW PROFILE, HYDRANT NUT CAP

**KEY FEATURES:**

- Aluminum Alloy 6061-T6 extruded forging only.
- (3) Stainless steel set screws for mounting.
- The NH thread female adapter contains a flat rubber gasket which seals against the male hydrant nozzle.
- The head has a 1/2” relief machine cut around the outside creating a recess for the insertion of highly visible, reflective yellow tape.

**CAP CONSTRUCTION:**

**ASSEMBLY**  
Both the center cap and the outer assembly containing the Storz ramps and lugs is Aluminum alloy 6061-T6 forged extrusion only. Cap is equipped with cable. Once installed, the Storz Hydrant Converter with cap extends less than 3” from the hydrant nozzle.

**CABLE**  
3/32”, (7 x 7) Stainless steel aircraft cable w/stainless steel eyelet end is supplied with the cap.

**GASKETS**  
Commercial grade neoprene & molded SBR rubber

**SCREWS**

HYDRANT CONVERTERS
SZMC Storz Standard Style

KEY FEATURES:
- Aluminum Alloy 6061-T6 extruded forging only.
- (2) Stainless steel set screws for mounting.
- Set screws must be mounted 180 degrees apart.
- The converter is hard anodized aluminum metal face seal and hard anodized aluminum Storz ramp and lugs.
- The NH thread female adapter contains a flat rubber gasket which seals against the male hydrant nozzle.
- The high torque, anti theft cap requires a Storz wrench for removal.

CAP CONSTRUCTION:

ASSEMBLY Both the center cap and the outer assembly containing the Storz ramps and lugs is Aluminum alloy 6061-T6 forged extrusion only. Cap is equipped with a chain. Once installed, the Storz Hydrant Converter with cap extends less than 3" from the hydrant nozzle.

CABLE 3/32", (7 x 7) Stainless steel aircraft cable w/ stainless steel eyelet end is supplied with the cap.

GASKETS Commercial grade neoprene & molded SBR rubber

SCREWS 304 stainless steel socket head screws

Cover Color Options

Also available in Micralox, Hardcoat and Powder Coat options.
HYDRANT CONVERTERS

SZMC Low Profile, Hydrant Nut Cap

KEY FEATURES:

- Aluminum Alloy 6061-T6 extruded forging only.
- (3) Stainless steel set screws for mounting.
- The NH thread female adapter contains a flat rubber gasket which seals against the male hydrant nozzle.
- The head has a 1/2" relief machine cut around the outside creating a recess for the insertion of highly visible, reflective yellow tape.

CAP CONSTRUCTION:

ASSEMBLY: Both the center cap and the outer assembly containing the Storz ramps and lugs is Aluminum alloy 6061-T6 forged extrusion only. Cap is equipped with cable. Once installed, the Storz Hydrant Converter with cap extends less than 3" from the hydrant nozzle.

CABLE: 3/32", (7 x 7) Stainless steel aircraft cable w/stainless steel eyelet end is supplied with the cap.

GASKETS: Commercial grade neoprene & molded SBR rubber

SCREWS: 304 stainless steel socket head screws
**BUTTERFLY VALVE**

**KEY FEATURES:**

- The Inner Disc closes off the flow.
- Rotating the handle to open the disc a quarter turn allows an almost unrestricted water flow.
- The 10 position Lever Handle, with positive detents allows the valve to be opened or closed incrementally for a controlled water flow.
- Comes standard with Bleeder Valve.
- Available with Threaded, Storz, Camlock connections, Hand Wheel and other sizes.
- Weight: 45 lbs.
09K GATE VALVE

Excellent shut off valve used on 2 1/2" Hydrant outlets to control water hammer and reduce hydrant main damage. Offering two styles of handles, traditional hand and crank, this valve has a lightweight, durable aluminum body construction which is powder coated for corrosion resistance.

**KEY FEATURES:**
- Non rising stem with crank
- Metal to metal seat
- Ideal for use in hose testing and on hydrants, stand pipes and pumps.

26K 2-Way Ball Valve in use.
70K PISTON INTAKE VALVE

A compact, lightweight, powder coated aluminum body piston valve with a 45 degree valve. Corrosion resistant brass piston and designed for maximum flows.

**KEY FEATURES:**

- Highly corrosion resistant chrome-plated brass internal piston.
- Large turbulence reducing oval waterway for minimal friction loss.
- Forged storz head with stainless steel locking mechanism.
- Pressure relief valve allows for easy adjustments from 75-250 PSI in increments of 25 with round 2 5/8” dump.
- Extends only 10 1/4” from pump panel.
- Available with full time swiveling storz heads to prevent hose kinking.

Tested per NFPA 1965

ST2 DRY LUBRICANT

ST2 is a dry lubricant that will ease the connection of both Storz and Threaded parts. It is environmentally friendly containing NO grease. The lubricant applies wet, yet maintains it’s smoothness when dry, preventing the attraction of dirt and debris. ST2 comes in a 2 oz. plastic spray bottle, sold as a case of 12 individual bottles.

Counter Top Display Box

12 oz. Trigger Spray
Spray or Stream

ST2-12OZ
KOCHEK ADAPTERS

Kochek offers a variety of adapters. They are available in a variety of configurations such as rocker lug, long handle, rigid, swivel, storz and special thread. They come in a many sizes and different finishes. The adapter lines meet or exceed all NFPA Standards.

Examples of: Micralox and Hardcoat Color
Other Colors Available

FINISHES:

K-COAT Tough, durable powder coating that is non conductive to help inhibit electrolysis, color consistent to delta 0.5, and available in many vivid colors.

NATURAL HARDCOAT 3/32", (7 x 7) Stainless steel aircraft cable w/ stainless steel eyelet end is supplied with the cap.

GASKETS High quality, durable finish that is most often specified by manufacturing engineers. Satin finish that meets Mil Spec 8625 Type III Class I.

HARDCOAT Vibrant anodized color, attractive, versatile, durable, even coverage, meets Mil Spec 8625 Type III Class II.

MICRALOX® A patented micro-crystalline anodizing process, offering long lasting colorized color hardcoat that offers superior resistance to abrasion and chemical corrosion. It extends the life of aluminum parts up to 10 times compared to conventional aluminum anodic coatings having withstood 15,000 hours of salt spray with no pitting. Ideal for harsh environments, coastal areas, marine applications or roadways where salt corrosion is a concern. Meets Mil Spec 8625 Type III Class II.

All adaptors are available in all finishes.
COLOR CHART

Our finishes are a great method to color code, whether it be K-Coat, Hardcoat or Micralox. Each finish type will now be indicated by a one-letter suffix/revision. For finishes where color options are available, these will be indicated by a two-digit color code.

<table>

COLOR DESCRIPTIONS:

**K-Coat**  Tough, durable powder coating that is non-conductive to help inhibit electrolysis, color consistent to delta 0.5, and available in many vivid colors.

**Natural Hardcoat**  High quality durable finish that is most often specified by manufacturing engineers. Satin finish meeting Mil Spec 8625 Type III Class I.

**Hardcoat**  Vibrant anodized color, attractive, versatile, durable, even coverage. Satin finish meeting Mil Spec 8625 Type III Class II.

**Micralox**  A patented micro-crystal line anodizing process, offering long lasting colorized hardcoat with superior resistance to abrasion and chemical corrosion. It extends the life of aluminum parts up to 10 times compared to conventional aluminum anodic coatings, having withstanded 15,000 hours of salt spray with no pitting. Ideal for harsh environments: Coastal Areas, Marine applications or roadways where salt corrosion is a concern. Meets Mil Spec 8625 Type III Class II.

**K-Chrome**  Industries brightest high gloss chrome powder coating specially applied to have unparalleled chrome appearance and high reflectivity.

Kochek Storz Building Connections are used as an auxiliary inlet to help supplement a fire protection system’s water supply. Coupling reduces the typical connect time for emergency responders versus traditional threaded appliances. The lugged Storz head and cap make installation easy with standard wrenches in the market. The Nitrile gasket seals the Storz head and cap. This seal prevents moisture and foreign matter from entering the connection. Our Stainless Steel locking lever keeps the cap engaged and is a means for the installer to know when seal is complete.

**MATERIAL:**
- Forged Aluminum T6160, Nitrile Gasket

**FINISHES:**
- **Standard:** Powder coat (17 standard colors)
- **Other Choices:** Hard coat, K-Chrome and K-Brass
EXTERNAL STANDPIPE SLEEVES

Why settle for a traditional stand pipe whose finish will **discolor** or **oxidize** over time after being exposed to weather & other elements? Kochek stand pipe coating is made from extruded seamless aluminum that is not affected by UV light and their appearance will look **new** for many years.

- Custom lengths are available upon request
Kochek flanges are made from carbon steel and can be used by in a variety of industries, including: firefighting, waste water & water management and industrial applications. They’re a great way to designate proper hook up.

Our powder coat finish offers a broad selection in color:
- Robin’s Egg
- Dark Blue
- Lavender
- Evergreen
- Silver Fern
- Purple
- Fire Engine Red
- Light Burgandy
- Silvadillo
- Yellow/ Lime
- Safety Yellow
- Safety Orange
- Sky White
- Almond
- Black Wrinkle
- Lucy Brown
- Bronze
- Black

LAZER ENGRAVING:
Custom laser engraving of company’s names and logos
CARBON STEEL ANSI FLANGES

For ordering Kochek’s carbon steel ANSI flanges please note that for other powder coated colors add a "-Y" to the part number and indicate color. (For example: FGM66-Y Red) For ordering the option with 300lb. ANSI flange, add "-300" to the part number. (For example: FGM66-300)

<table>
